Sanitiser Anhydrous Alcohol (SAA)

RE: suitability for use in hand sanitiser formulations.

To whom it may concern,

Lactanol SAA grade ethanol has been tested and assessed by Independent Laboratories and Fonterra Food Assurance teams, for general quality and impurities that may impact on the usage of ethanol in hand sanitizer formulations.

Based upon the above, SAA grade ethanol has been assessed as suitable for use in hand sanitizer formulations.

Yours Sincerely

Lactanol Limited

Kim Manson
Ethanol Co-ordinator
